

Northside Dental — Testing Feedback

Date: 15 July 2026

Tested by: Clinic Practice Manager

What we tried

We booked six test appointments from the clinic website and opened the daily schedule screen for two of our dentists.

What we found

Online booking works. Every test appointment was saved against the dentist we chose.

The email reminder works. Each test patient received the reminder before the appointment.

The daily schedule screen shows the wrong day. It opens on tomorrow's list instead of today's.

The SMS reminder still does not reach the patient. We are logging this one as a bug.
